Equal Access to 21st Century Communications Act

The United States Senate recently passed the **Equal Access to 21st Century Communications Act** which will provide updates to our nation's communication laws. These updates will ensure that new technologies such as internet, television programming, smart phones and programming features on DVD players are accessible to people with disabilities. This measure will provide more options for individuals who are hearing or visually impaired. Once signed into law, this legislation will ensure that the 25 million Americans with vision loss and the millions more with other disabilities can fully participate in the digital era.

Optelec ClearReader +

Text To Speech Recognition A New Concept In Reading

For those who struggle to read with reading glasses, optical low vision aids or video magnifiers, reading becomes easy

with Optelec's **ClearReader+**. Optelec has always been on the cutting edge of technology for the visually impaired and their new portable **ClearReader+** is no exception.

With the **ClearReader+** you can rediscover the joys of reading anytime and anywhere. Access to printed documents such as magazines, newspapers, books or a letter from a

friend has never been easier. Portable and battery powered, the Optelec **ClearReader+** assistive technology device can be used in the home, at school or at work, making it ideal for reading a recipe in the kitchen, reading a book at home or reviewing bills.

To operate, turn on the unit, release the camera arm and place the reading material under the high-resolution camera. Then simply press the scan button to take a snap shot of the text, and in seconds the Optelec **ClearReader+** will read the desired text in high quality speech.

With only five controls, the Optelec **ClearReader+** is one of the most intuitive and user-friendly text-to-speech devices available. Additionally, the Optelec **ClearReader+** is easily customized to read text at different speeds, in up to twelve different languages and twenty-three different voices. **The ClearReader+** is now available at the ViewFinder Low Vision Resource Centers.

NEW Mobilux Digital

Eshencbach has just released the first portable, hand-held video magnifier

featuring revolutionary AMOLED display technology. An AMOLED (Active Matrix Organic Light-Emitting Diode) display produces the highest contrast image, the fastest image processing and best resolution of any video magnifier on the market. The **Mobilux Digital** also features the highest resolution thanks to a 2.0 megapixel camera sensor, guaranteeing users that images captured on the screen will be the sharpest images available.

Due to this innovative new display, there is no 'ghosting', 'smearing' or fading of images when the camera is moved. Looking at a **Mobilux Digital** image is like looking through a window. This easy to use, light weight (5.7oz) portable video magnifier provides 3X and 6X magnification and three viewing modes: color, black on white and white on black. Now available at the ViewFinder Low Vision Resource Centers.

1830 South Alma School Road, Suite 131 • Mesa, Arizona 85210 • 480.924.8755

10001 West Bell Road, Suite 115 • Sun City, Arizona 85351 • 623.583.2800

Our doctors also see patients at several satellite offices throughout the state of Arizona. Please call our toll free number 866.924.8755 or 480.924.8755 to schedule an appointment at one of these offices.
