Visit ViewFinder's New Website

ViewFinder's website located at www.ViewFinderLowVision.com has finally received a much needed makeover. Visit our website to learn more about our practice, our staff and the many low vision solutions that are available to help our clients maintain their independence. You will learn about solutions for driving, seeing television, reading and using your computer. You will also be able to read past ViewFinder E-News Newsletters.

Our favorite new feature is the **Downloadable Tools Section** where you can download a large print check register, large print address book, large print calendar, large print diabetic register and heavy lined writing paper. You can also download our resource directory to learn about the many Arizona services that are available for people who are visually impaired.

Our mission is to improve the quality of life for those who are visually impaired through awareness, resources and solutions

A Great Product Made Even Better!

Earlier this year, Eschenbach of Germany introduced its hand held portable digital magnifier the **Mobilux Digital** that features new technology giving the display the highest contrast image, the fastest image processing and best resolution of any video magnifier on the market. The **Mobilux Digital** also features the highest resolution thanks to a 2.0 megapixel camera sensor, guaranteeing users that images captured on the screen will be the sharpest images available.

Mobilux Digital with Detachable Focusing Stand

Due to this innovative new display, there is no 'ghosting', 'smearing' or fading of images when the camera is moved. Looking at a **Mobilux Digital** image is like looking through a window. This easy to use, lightweight (5.7oz) portable video magnifier provides 3X and 6X magnification and three viewing modes: color, black on white and white on black.

While this is our favorite new product of this year, the **Mobilux Digital** now has a detachable focusing stand making it even easier to use for extended reading. The stand rests on the reading material always keeping the print in focus while preventing hand fatigue. The stand can be removed easily making it more compact so that it can fit in a shirt pocket or small purse.
