DaVinci the Next Generation of Video Magnifiers High Definition • Text-to-Speech • (OCR) • 3-in-1 Camera

Like all products, video magnifiers continue to improve with time making them easier to use. They are often the primary low vision aid used for reading and writing. **Enhanced Vision Systems** has now radically changed the future of video magnification systems with the introduction of the **DaVinci**.

DaVinci not only magnifies up to 77X, it will read any printed text aloud with the push of a button

View objects at a distance including your television

The **DaVinci** is a high performance desktop video magnifier (CCTV), featuring a high definition (HD) monitor, text-to-speech (OCR) and a 3-in-1 camera. With HD you will experience high definition color and contrast giving you a beautiful, crystal clear picture and vibrant colors.

You will experience the joy of reading with the new text-to-speech feature. **DaVinci** will read any printed text aloud with the push of a button.

Our mission is to improve the quality of life for those who are visually impaired through awareness, resources and solutions

**Camera rotates 340 degrees.
See near, far and in-between.**

The DaVinci can be used as a video magnifier to see near, far and everything in between. You may also use the self-viewing camera position, like a mirror, for applying make-up or other personal grooming tasks.

Whether at work, home or at school, you'll have the freedom to read, write, view presentations, see television at a distance, and work on crafts and hobbies. *Best of all, the price is similar to a standard video magnifier without these special features.*

(0% financing available)

***The magnification and text-to-speech features
make reading enjoyable again!***

**1830 South Alma School Road, Suite 131 • Mesa, Arizona 85210 • 480.924.8755
