## The SightScope

### Ocutech's *Newest* Telescope

ViewFinder's doctors are pleased to be one the first practices in the country to evaluate and prescribe Ocutech's new **SightScope**. This new telescope is available in 1.7X and 2.2X and is useful for people with 20/100 vision or better. It can be mounted straight ahead on standard eye glasses which allows a normal posture for straight-ahead visual activities such as television, theater and sporting events. When the telescopes are mounted in the bioptic position, the wearer can switch viewing through the eyeglass lens and the telescope with just a slight head tilt. This allows the wearer to see better at distance when driving and performing other visual tasks when moving or walking.\*

Reading caps, when added to the telescope, will allow magnification of near objects and can be used for reading. The SightScope can be flipped-up and out of the way when not being used. Best of all, the telescope is nearly half the price of many of our other custom telescopes.

\* A bioptic driving license is required when used for driving. Please call for details.

Our mission is to improve the quality of life for those who are visually impaired through awareness, resources and solutions

## ViewFinder Large Print 2013 Calendars Available by Mid-October 2012

The beginning of a new year is fast approaching and it is time to get your 2013 calendar. This year we have two sizes available, Legal Size Large Print (17"X11") and our very popular Extra-Large Print (22"X17").

You may also download a Large-Print calendar in Legal Size (17"X11") or Standard Size (11"x8.5") directly from our website. Also available for download from our website is our Large Print Address Book, Large Print Check Register, Heavy Lined Paper and Large Print Diabetic Register.
