## Portable Video Magnification

Unlike optical magnification, video magnification allows several magnification powers in one device, enhanced contrast of text and decreased glare. Our two newest devices allow reading and writing while on the go.

### Eschenbach SmartLux Digital

The **SmartLux Digital** is a revolutionary, portable video magnifier that has a multitude of features, all for a very economical price. The large 5" LCD TFT display provides 5x, 7x, 9x, or 12x magnification along with 5 different viewing modes that include full color, black on white, white on black, black on yellow, and yellow on black. Illumination is

provided by 2 hi-tech SMD LEDs and the tactile control buttons are easy to understand and use. Images can be captured and up to 20 can be stored.

The SmartLux Digital features a generous depth of focus and includes a stand that, when placed in its fully extended position, is ideal for reading. When placed in its half-extended position, it is ideal for writing. The two small SMD-LEDs on the underside

of the device can be switched off when viewing other backlit displays, such as cell phones, to avoid screen glare

The screen is hard-coated for protection and is made with an additional anti-glare layer of film. The device is completely portable and is lightweight at 7.8 ounces and fits in a purse or large pocket. Simple control buttons are symbolically marked and there are only 3 to learn: On/Off, Magnification setting, and the Contrast Mode. There is a 2-year warranty.

The SmartLux Digital is due to arrive in each office by December 21, 2012.

## Optelec Compact 7 HD

This product is the first high definition handheld video magnifier with a large 7-inch widescreen. It has been so popular since its arrival in November that we have had a hard time keeping them in stock.

Imagine using a high definition magnifier providing a greater overview with more words per line combined with the best available image quality. The Compact 7 HD integrates the largest screen available in the Optelec Compact product family; still it is small enough to be carried easily from one location to another.

### Key benefits:

- Continuous zoom: 2 to 24 times magnification
- High Definition auto-focus camera for superior images and intuitive reading
- 7-inch full color TFT widescreen display
- High contrast semi-colors for easier reading
- Tilting screen position for comfortable viewing
- Designed to move smoothly over reading materials
- Innovative lighting design for a consistently-lit on-screen image
- Snapshot facility with audio indication sounds
- Large icon settings and information menu
- Rechargeable battery offering an average of 4 hours continuous use
- Carrycase, wrist strap and a screen cleaning cloth
