“I Can’t Read My Own Writing”

This is a common complaint from our customers and a problem with easy solutions. The simplest solution is to write “bigger and bolder”. As our vision changes, it is not always intuitive to do things differently. In this case write larger and use a felt tip black marker such as the **20/20 Pen** to make the print bolder. Use a black pen or marker and use white or yellow paper to maximize contrast.

Heavy lined paper will help you write neatly and on a straight line. This paper can be downloaded at no cost from our website and pads can be purchased at our offices.

Other useful tools are letter guides, signature guides, envelope guides and check guides.

Our mission is to improve the quality of life for those who are visually impaired through awareness, resources and solutions

Upgrade Your Existing Optelec ClearView⁺ Video Magnifier

The Optelec ClearView⁺ Desktop Video Magnifier has been a popular product with ViewFinder customers for several years. An upgrade is now available that will convert your current Optelec ClearView⁺ Desktop Video Magnifier to an Optelec ClearView⁺ with SPEECH.

Existing ClearView⁺ magnification users can upgrade their model to make it Speech compatible. The upgrade adds a new 24" monitor that will give you the same great features that allow you to read and write with continuous zoom magnification up to 95 times. The new monitor adds an easy to use reader.

To activate the Speech feature, simply touch the screen and instantly enjoy listening to newspapers, articles, letters and books with a natural sounding voice and full page overview. Just sit back, relax, and listen as your material is read aloud. There are over 60 voices in 30 languages. Contact ViewFinder staff if you are interested in an upgrade to your current system. If you do not have an existing ClearView⁺, the ClearView⁺ with Speech is also sold as a stand alone system.
