Optelec's Revolutionary NEW Video Magnifier Design

ViewFinder is proud to introduce the new **Optelec ClearView C**, a modern desktop video magnifier that is designed to improve your reading experience. The unique design provides more working space and helps you to read your favorite newspaper, enjoy craftwork or write a check without being restricted in movement. When designing this new product, Optelec decided to eliminate all of the difficulties that video magnifier users experienced.

The **ClearView C** is designed to increase your reading comfort and to match the interior of your home. It looks modern and stylish so it perfectly fits your living space. The **ClearView's** C-shaped design provides you with more working room. This helps you to do your hobbies and to read your favorite newspaper without being limited in your movements. Whether you prefer simple or advanced options, the **ClearView C** offers both. Would you like to use reading lines, adjust the contrast or enable the writing mode? Just reverse the Control Pad and enjoy powerful advanced functions.

The **ClearView C** is available with and without an OCR reader. If reading becomes tiresome, the OCR reader will read your documents aloud. To see our complete line of video magnification products please visit either office location. If you would like to schedule an in-home demonstration please call our assistive technology specialist Elizabeth Evans at 602.617.6978.

ViewFinder Monthly Seminars

Please join our doctors for our monthly seminars where you can learn the tools and tricks to help maintain your independence despite visual impairment. You are invited to ask questions regarding eye disease, new research or new low vision aids. Our doctors have experience in working with the **CentraSite Implantable Telescope** and the **Argus II Retinal Chip**, popular topics during our monthly discussions.

Like Us On Facebook

Please visit the ViewFinder website www.ViewFinderLowVision.com to learn about solutions to visual impairment and download useful tools such as a large print check register and large print address book. While you are on our website or on your Facebook account, please like us!

Patricia Rafferty MOT, OTR/L Joins the ViewFinder Family

Patricia brings over 15 years' experience in occupational therapy services and has worked with diverse populations in a variety of settings. She will be applying her extensive experience, knowledge, holistic approach and problem-solving skills in service to the clientele of ViewFinder Low Vision Resource Centers in both Mesa and Sun City. She will also provide *In-Home* services to her clients.

Occupational Therapy services are available to address and improve an individuals' independence and participation in life despite the challenges of a low vision diagnosis. Patricia will evaluate and advise her clients in the selection of optimum lighting for desired tasks, instruction in the use of special low vision glasses and bioptic telescopes and identify assistive technology and devices for improved independence.
