Dr. Carlos Grandela

ViewFinder Welcomes Dr. Carlos Grandela

Dr. Carlos Grandela is originally from Virginia Beach, VA. He received his undergraduate BS degree at Brigham Young University. Here he met and married his wife, Neltje. He then attended the Southern College of Optometry in Memphis, Tennessee where he obtained his doctorate in Optometry. During optometry school, the Grandelas welcomed two children to their family, a boy and a girl. Dr. Grandela completed a residency in Low Vision Rehabilitation and Ocular Disease at the Illinois College of Optometry and the Chicago Lighthouse in Chicago, Illinois. He is bilingual, speaking both English and Spanish fluently. In his spare time, Dr. Grandela likes to fish, hike, try new restaurants and go on adventures with his family. He is accepting patients at both ViewFinder offices.

Easy-to-See Large Print Speedometer for Your Smart Phone or Tablet

A common complaint from many of our drivers is that they cannot easily see their dashboard, especially the speedometer. Many older cars have dashboards that are hard to see even for people who see well enough to drive legally and safely. Newer cars often have digital displays with many features close together making quick viewing difficult.

GPS - Digital Speed Tracker is a free, simple and elegant speedometer application for your iPhone or even your iPad. **GPS - Digital Speed Tracker** uses the iPhone's built-in GPS system to show your current, maximum/top and average speed, as well as the heading direction, total distance, trip time and altitude in a single screen. This app is perfect for car driving and biking. Simply attach an iPhone holder to your dashboard and turn on the app and enjoy your trip. (Other speedometer app brands are also available for your smartphone).
