OrCam Products
The Worlds Most Awarded Company
for Wearable Technology

OrCam Technologies was founded in 2010 with the vision of improving the quality of life for people who are blind and visually impaired. Since then it has become the worlds most awarded company for wearable technology for the blind and visually impaired. Included in it's multiple awards, the **OrCam MyEye 2** was chosen for the best inventions of 2019 list by **TIME Magazine**.

OrCam Read

For People with Reading Difficulties

Low Vision · Dyslexia · Learning Disabilities · Aphasia

OrCam's newest device is the **OrCam Read**. It is a handheld reading device that reads from any printed surface or digital screen. It is the size and shape of a pen and has an amazing OCR (Optical Character Recognition) capability. It is fast, accurate and easy to use. Similar to **OrCam MyEye**, it takes a picture of the text and instantaneously reads it aloud or quietly into an earbud.

Unlike all other devices where you must scan line-by-line, **OrCam Read** will capture a full page of text, even from a computer screen.

OrCam MyEye 2

Now Wireless

OrCam MyEye is an intuitive artificial vision device that magnetically clips onto a pair of glasses. It is wireless, lightweight and discreet, weighing less than an ounce. It will help you perform certain tasks that you may be struggling with because you can't see or can't see well enough.

The **OrCam MyEye** can be activated by an intuitive pointing gesture, by tapping or simply by following the wearer's gaze. The device will read print from any surface at distance or near including newspapers, books, menus, signs at a distance, labels, computer monitors and phones. It can also identify colors, known people, read bar codes, and money.

Shop with independence and confidence.

OrCam My Eye will identify the money in your hand, the colors of clothes and will read labels
